

Hotel Booking Management

- **A brief description of the objectives**

I choose this project because I have done a similar one using JAVA, so I have some information about it. Hotel managers and Hotel reception staff will use my project

- **Schedule**

- **Iteration 1**

This Iteration will focus on the project plan, make the main documents that help us to know our start point and skeleton code. This Iteration will start on 6/8/2020, and the deadline for this Iteration is 6/9/2020.

- **Iteration 2**

This Iteration will focus on the implementation. The implementation should start according to the Model. This Iteration will start on 6/9/2020, and the deadline for this Iteration is 6/13/2020.

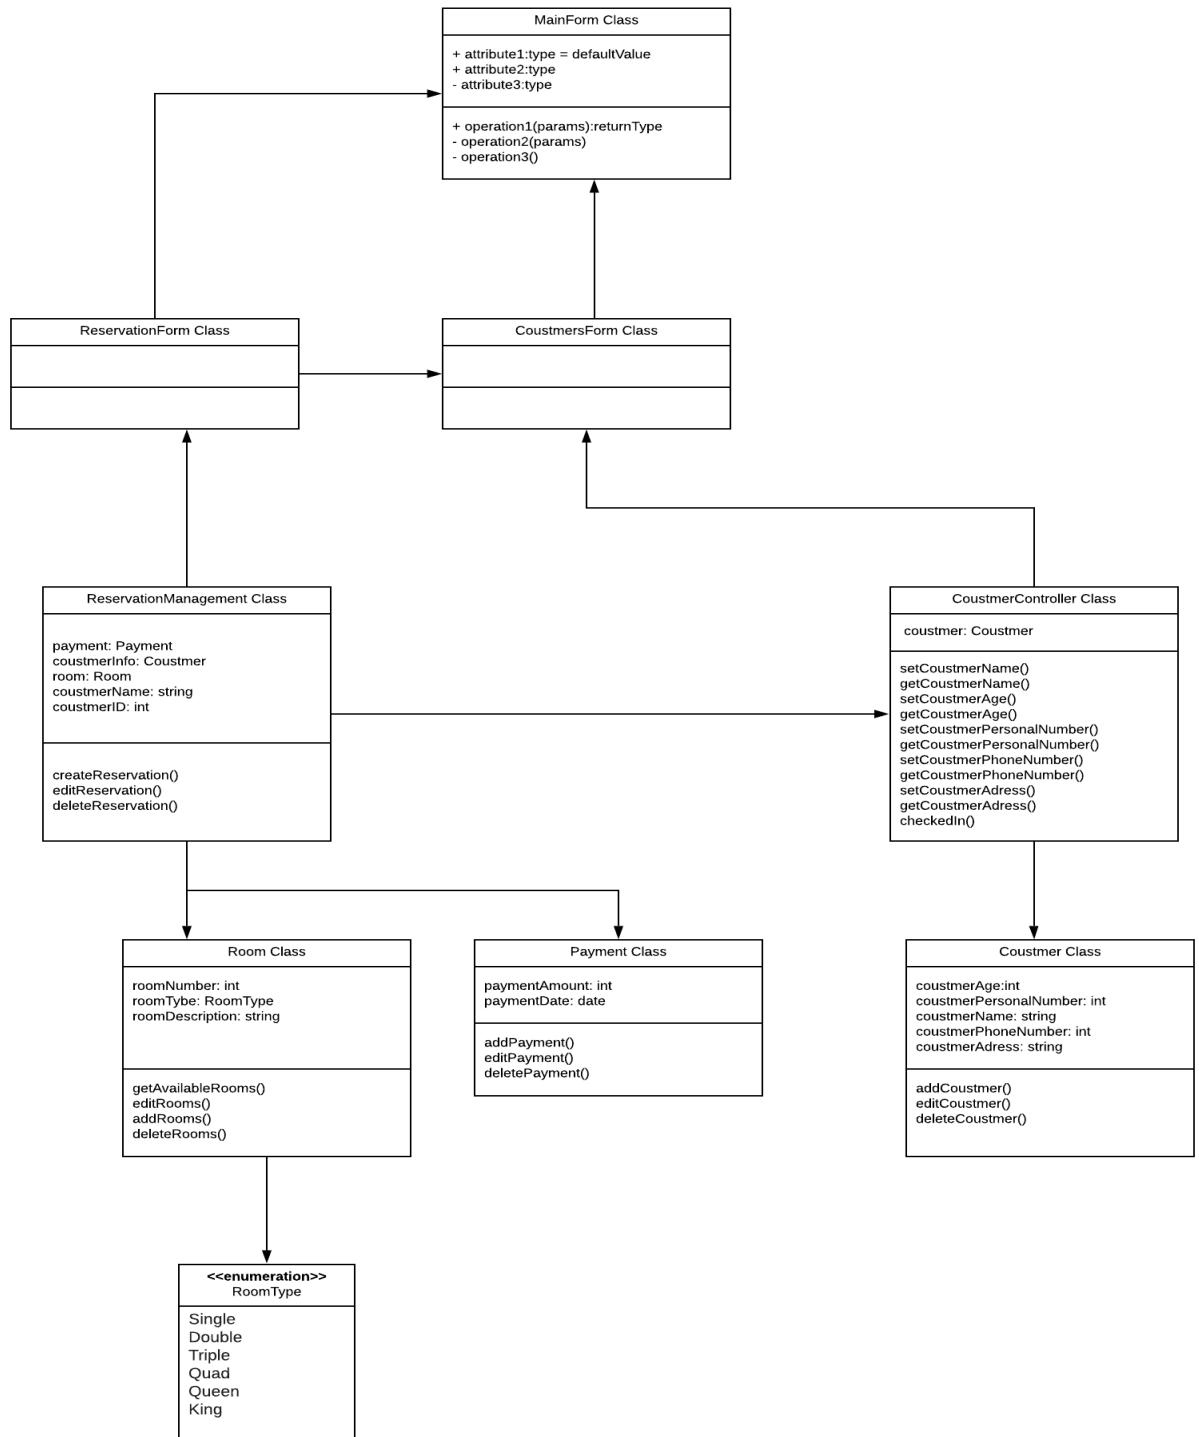

- **Iteration 3**

This Iteration will focus on testing the logic code that we added in the previous Iteration and fix bugs if there is. This Iteration will start on 6/13/2020, and the deadline for this Iteration is 6/14/2020.

- **Iteration 4**

This Iteration will focus on delivering the final release. This Iteration will start on 6/14/2020, and the deadline for this Iteration is 6/15/2020.

• Class Diagram

In this project, I will use MVC Design Pattern. Therefore UI should not communicate with the Model directly but throw Controller.
